Immo AT4 3V

New, Lightweight, Breathable

**3-Panel Knee
Immobilizer**

IMMO AT4 3V

3-Panel Knee Immobilizer

Indications

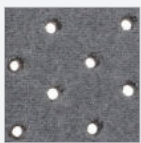

- Pre- or post-operative total immobilization of the knee joint.
- All conditions requiring immobilization in extension: ligament injuries, patella or meniscus injuries, knee surgery (arthroscopy, arthroplasty...), emergency immobilization or delayed diagnosis.

Features & Benefits

Universal 3-panel design

- Ease of application
- Adapts to patient thigh circumference

Perforated foam construction

- Enhances breathability for optimal comfort

Lightweight structure

- Less than 600 grams
- Promotes patient compliance without compromising immobilization

Aluminium bilateral stays

- Malleable & removable, can be adjusted to patients' needs

Aluminium posterior stay

- Malleable & removable, allows for strict immobilisation in extension

Anti-migration strap

- Positioned under the knee, avoids brace slipping

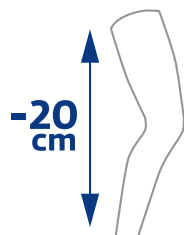

Low profile buckles

- Flat, discreet, combined with contact closure straps for secure hold
- Only 1 initial setting needed

Sizing & Ordering

- Bilateral model, fits Left or Right leg
- Available in 5 heights: 30, 40, 50, 60, 65 cm
- For correct height: measure the inseam of the leg and deduct 20 cm
- 3-Panel design adapts to thigh circumference
- Accessory: Lateral stays with 20° of flexion available
